

The Thoroughbred
of Transportation

CAPACITY

- 263,000 LBS
- 286,000 LBS
- 315,000 LBS
- NS Lines

Certain line segments will require operating restrictions. Current timetables must be consulted to determine spacer car requirements, speed restrictions, etc.

Allowable weights shown apply to NS main tracks only. Map does not indicate an ability to handle on industrial tracks.

Where trackage rights or haulage rights exist, consult owning railroad for their weight limitations.

Allowable weights shown apply only to 4 axle cars having coupled length, axle spacing and truck centers not less than the following:

For gross weights between 220,001 and 286,000 lbs.	Coupled Length	37'-7"
	Truck Centers	25'-3"
	Axle Spacing in Trucks	5'-8"

Bridge and Track Weight Capacity

Not For Clearing Loads
